10 Tips for Taking Medication Safely

Medication mistakes happen every day at the doctor’s office, hospital and even at home.

Some mistakes are more serious than others, but all medication mistakes can be prevented.

Here are 10 basic steps that will help prevent a medication mistake from happening to you or your loved ones.

1. Share with your doctor a list of your current medicines, vitamins, herbs and supplements. Use the MVP Personal Medication List on the back side of this page and the wallet-size version at left to help you.

2. When your doctor prescribes a new medication for you, ask what it is for, what to expect from the medication and how soon the medication will work. Ask how to take it. Can you crush it or cut it? Are you supposed to swallow or chew it? Ask what side effects you might experience.

3. Whenever you get a new medicine, remind your doctor about allergies you have, or negative reactions you have had to other medicines.

4. Take your medicine as it was prescribed, not more or less. Ask what to do if you miss a dose. Don’t stop taking a medication without checking with your doctor first.

5. If you are taking a lot of medicines, ask your doctor if it is safe to take those medicines together. Ask about vitamins, herbs and other supplements, too.

6. If you smoke cigarettes or drink alcohol, include the amount of alcohol you usually drink and the number of cigarettes you normally smoke on your Personal Medication List. This is important information because alcohol and nicotine affect certain medications.

7. Try to use one pharmacy for all of your prescriptions so that the pharmacist will know all of the medications you are taking.

8. When you pick up a medication that is refilled, before you leave the pharmacy, look at it to see if it looks the same as the medication you have been taking. If not, bring it to the attention of the pharmacist.

9. Whenever you are in doubt about a medicine, ask your doctor or pharmacist about it.

10. If you are hospitalized, take your Personal Medication List with you to the hospital. Make sure the list is up to date.

Copy all your medications on the form provided on the next page. Cut at the dotted lines and fold at the light blue lines. Keep this with you at all times in case of an emergency and share it with your physician.

If you need another form, come back to the web site at www.columbiamemorial.org and download a new form or call us at 503-325-4321 and we can send you one. You are always welcome to come by Columbia Memorial Hospital and pick up a new one.

### Date of last flu shot: [ ]

### Date of last pneumonia vaccination: [ ]

### Allergies/Sensitivities:

### Medical Conditions/Major Surgeries:

---

### Tips for your medication safety:

- List all medications you are taking, including over-the-counter drugs, supplements, herbal products, dietary supplements, vitamins, herbs, eye drops and inhalers.
- Use only one pharmacy if possible.
- Always carry this card with you.

Make sure ALL of your doctors know what you are taking. Give them a copy of your list. If possible, bring your medicines with you so that your doctors can see them.
